Your Partner for Marine, Oilfield and Logistics Solutions

"Impressed with the proficient approach of everybody at Altus and would like to thank you all for the participation and support"

"Exceptionally fulfilled along with your benefit and it has been a joy to work with you and the rest of the team"

www.altusoilandgas.com.my

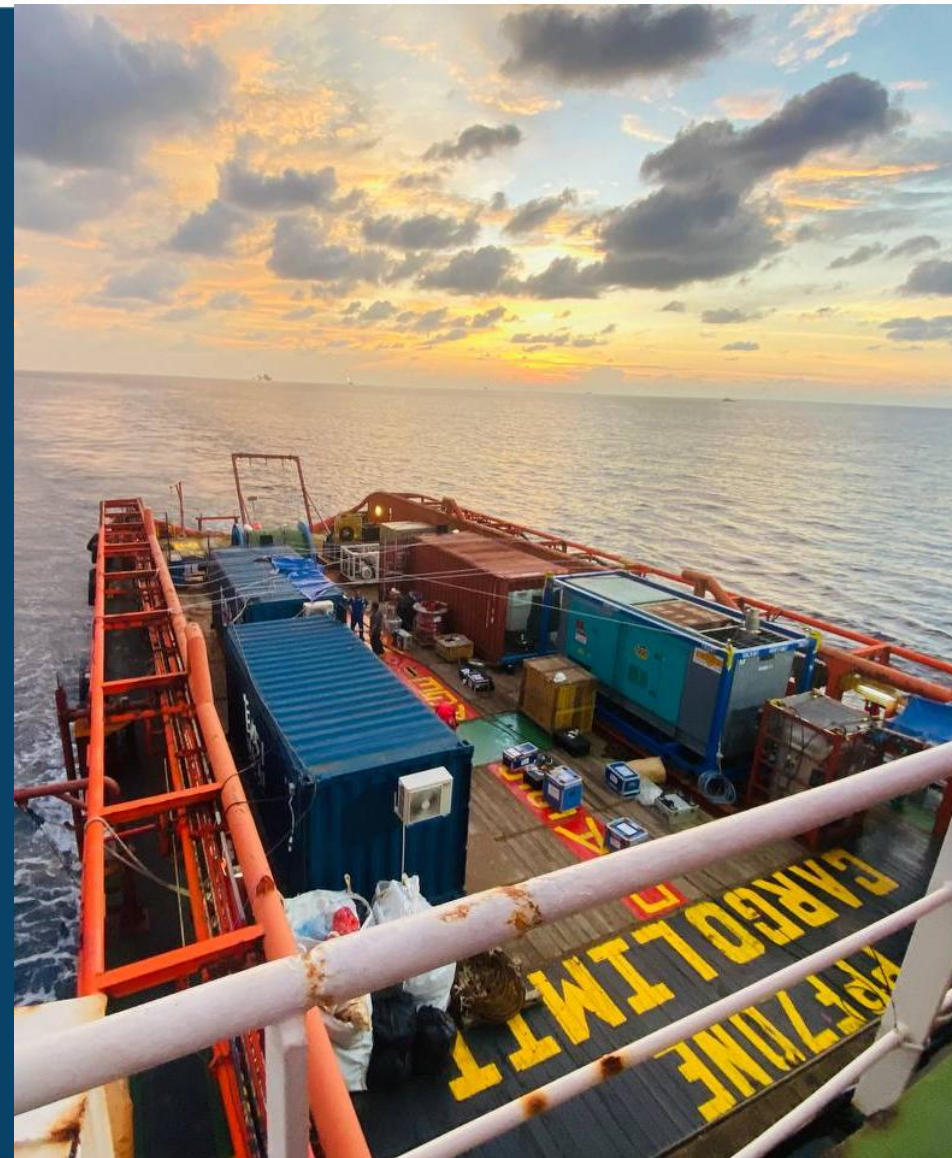

Altus Oil & Gas Malaysia Sdn Bhd, a subsidiary of Altus Logistics Malaysia Sdn Bhd was founded in 2010. From its humble beginning with 3 personnel and a small office in Johor, Altus Oil & Gas Malaysia has since grown its presence in the country with offices and onshore bases in Labuan, Bintulu, Miri, Kota Kinabalu, Kemaman, Kuantan, Johor, Tok Bali and Kuala Lumpur. Later, the company headquarters moved from Johor to Kuala Lumpur and currently employs more than 61 personnel.

Altus Oil & Gas Malaysia has solidified its position over the years and is rapidly expanding in marine, logistics, and oilfield solutions. We provide solutions for our clients with supply chain management, supply base operations, marine and oilfield support, equipment, and storage facilities.

Altus Oil & Gas Malaysia has a long history of supporting the energy sector and forms part of Altus Logistics Global Network. Through years of operating in their respective fields, our fully trained people have the capacity to formulate applicable solutions for our clients.

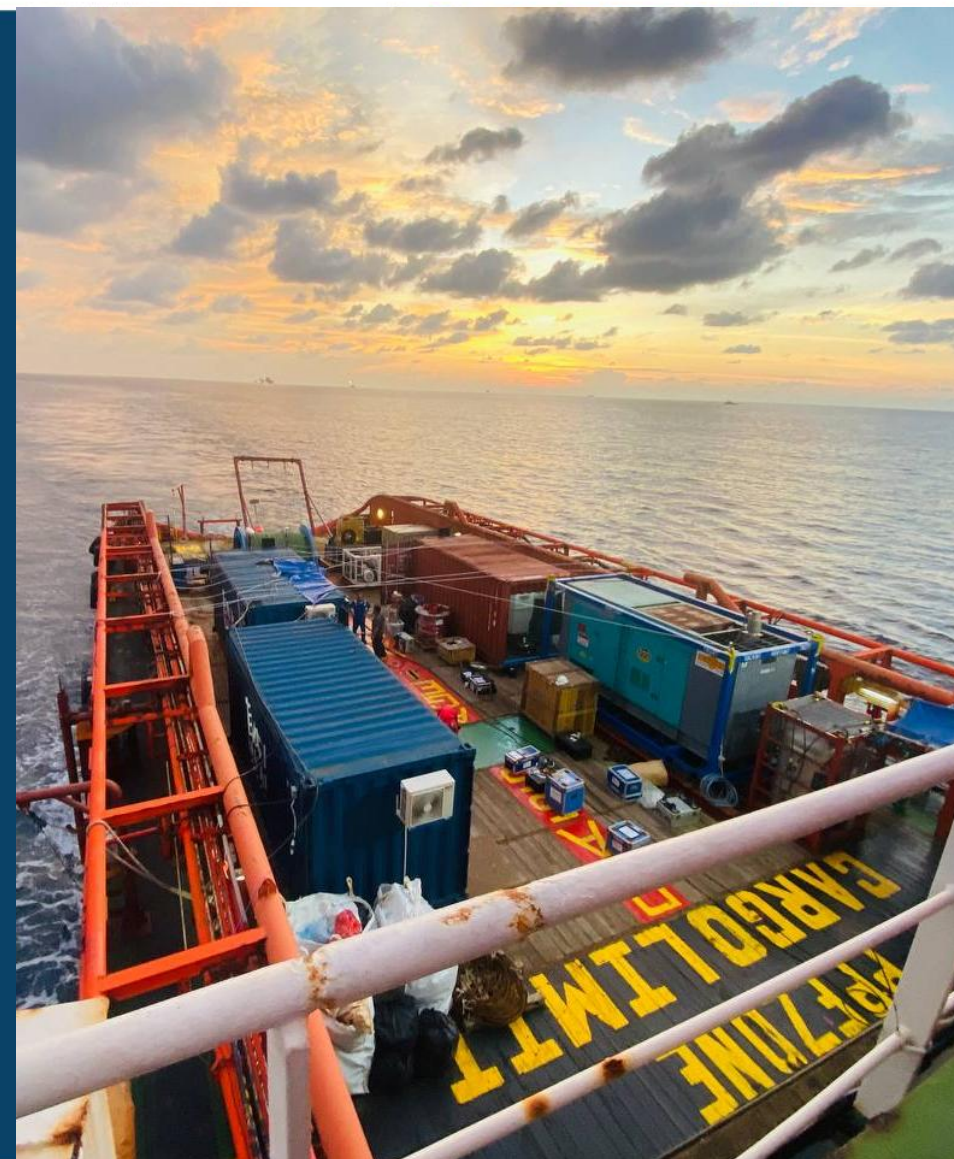

Marine Solutions

The provision of multiple activities related to vessels and rigs, are either provided to the clients within an integrated package or independently. Altus Oil & Gas's scope of work includes lay-up, preservation and maintenance, marine asset decommissioning, inspection and certification, and vessel charters.

Our lay-up services include hot lay-up mode (warm stacking) or cold lay-up (cold-staking). We evaluate the best lay-up location with the consideration of the client's asset current location and its next destination. To ensure the objective is met, we work with our clients to design the best turnkey lay-up scopes that match their cost-benefits, asset integrity and quick reactivation purposes.

Other than lay-up services, we are involved in equipment, spare parts and raw material preservation which covers the upstream and downstream industries. Preservation of equipment and spare parts is essential in maintaining the lifespan of the assets and managing the financial flow. At Altus Oil & Gas Malaysia, we provide state-of-the-art preservation services to our clients. The eco-friendly Vapour Corrosion Inhibitor (VCI) ensures spares are well preserved, at the same time minimising corrosion and damage while in storage. This preservation method covers a wide range of applications including electrical, mechanical and control systems.

Ship/Rig Lay-Ups

We recognise the critical importance of making informed decisions when laying up marine assets like vessels or rigs, especially during periods of low or no earnings. Our comprehensive approach is tailored to meet the specific requirements of our client's marine/rig assets while ensuring cost-effectiveness and asset integrity.

Our lay-up approach includes establishing hot or cold lay-up, selecting optimal lay-up locations and designing turnkey lay-up scopes that balance cost benefits, asset integrity, and rapid reactivation.

We provide comprehensive lay-up services from risk assessment, permit assistance, towing assistance, pilotage and towage, crew handling, boat services, security measures around the clock, towing and mooring analysis and design and installation, emergency response plan and procedures and asset maintenance.

At Altus Oil & Gas Malaysia, we prioritise value creation for our clients, ensuring that our marine solutions meet the highest standard of quality and efficiency.

Ship/Rig Preservations & Maintenance

Alongside our ship/rig lay-up services, we offer comprehensive solutions for ship/rig preservation & maintenance across Peninsular Malaysia, Sabah and Sarawak, ensuring optimal asset integrity and longevity in the challenging conditions of the region.

Idle marine/rig assets face significant risks without proper preservation and maintenance strategies in place, including rapid corrosion and wood delamination/splitting due to high humidity, mechanical seizure of rotating and sliding equipment and other mechanical components, and deteriorating function of electric and electronic products.

We conduct thorough evaluations for each lay-up scenario, considering factors such as climate, lay-up period, equipment condition, and reactivation time. Our scope of services includes:

- cost evaluation of preservation works,
- provision of manpower, dehumidifiers and vapour corrosion inhibitors,
- periodical inspection and maintenance visit to rig/vessels,
- onshore storage facilities for equipment removed prior to lay-up,
- procurement and minor fabrication works,
- tank inspection and demucking services, reactivation works
- security services to safeguard onboard equipment and spares.

Marine Asset Decommissioning

We offer comprehensive marine asset decommissioning services designed to meet regulatory standards and cost-efficiency requirements. Our expertise extends to the dismantling and decommissioning of rigs, offshore oil well platforms, and floating processing and storage units.

Our range of services for marine asset decommissioning includes:

- Removal works of equipment and facilities from the asset
- Utilisation of onshore base facilities, including wharf and storage yard, for removal operations
- Tank cleaning, deslopping, and demucking services
- Waste removal and disposal management in compliance with regulations
- Efficient logistics and transportation solutions
- Provision of cargo handling equipment, lifting cranes, and logistical support
- Testing and inspection services to ensure quality and safety standards
- Deployment of marine fleets for efficient operations
- Provision of skilled and experienced general workers to support various task

Our extensive presence across Malaysia and located strategically within the Altus Logistics Group Network, enable us to tailor and deliver our client's specific needs with professionalism. We are committed to providing value-driven solutions that prioritise safety, efficiency and environmental responsibility.

Inspection & Certification

The oil and gas industry is a highly regulated with complex processes, substantial investments, new technologies, and stringent legal, safety and environmental regulations. These regulations are crucial for ensuring continuous supply, achieving investment objectives, and safeguarding the personnel, the environment and assets.

At Altus Oil & Gas Malaysia, we recognise the significance of inspection and certification in meeting these objectives. Over the years, we have cultivated our expertise and deployed qualified inspectors for a range of inspections, including:

- Lifting appliances and gears
- Heavy cranes and lifting equipment
- Non-destructive testing (NDT)
- Drop objects
- Cargo carrying units inspection
- Pressure test and pressure relief valve test
- EX survey and inspection
- Mooring system – quick release hook (QRH) inspection, maintenance, calibration and repair
- Underwater inspection and repair

Equipment and Asset Preservation

Preservation of equipment and spare parts is essential in maintaining the lifespan of the assets and managing the financial flow. In providing excellent preservation solutions for our clients, we work with Magna International Pte Ltd as the sole authorized agent in Malaysia for Vapro Bio Corrosion Inhibitor (VBI).

This eco-friendly product is designed to suit the multi-climate condition and protect against corrosion for ferrous and non-ferrous metal. This preservation method covers a wide range of applications including:

- Electrical (printed circuit board, switchboard, breakers)
- Mechanical (metal product, pipes, casing, valves)
- Rotating parts (engines, pumps, turbines)
- Control systems

Our preservation products include VCI emitter, VCI pouch, VCI film, VCI paper, VCI oil and coating, VCI powder, VCI additives, VCI oilfield products, VCI lubricants, VCI gun lubricants, VCI cleaners, VCI aerosols, VCI masterbatches, and Vapro VBCI.

Vessel Charters

Recognising the pivotal role of marine offshore fleet support in our array of services, including Platform Service Vessel (PSV), Anchor Handling Tug (AHT), Work Barge, Flat-Top Barge, Crew Vessel, and Heavy Lift Vessel, Altus Oil & Gas Malaysia has cultivated an extensive portfolio of services and forged strategic partnerships with vessel owners in the region, thus enabling us to customise our solutions to meet the client's specific requirements. Our expertise extends to vessel chartering in Malaysia, ensuring seamless access to a diverse fleet for your operational needs.

Asset Integrity Management

The three main elements of an Asset Integrity Management System (AIMS) are design, technical integrity and operational integrity. Asset integrity applies from the beginning of conceptual design, fabrication, preservation, operation up to the final cycle or decommissioning of the asset. Therefore, it is essential to ensure these elements are well maintained and executed to ensure the assets are in a fit-for-service condition till the end of the asset's life cycle.

Our experts have in-depth knowledge of the oil & gas and petrochemical fields, providing asset integrity management solutions that clients need to achieve productivity gains while meeting safety and environmental concerns.

Oilfield Solutions

The complementary services for oilfield solutions include offshore containers and equipment, lifting equipment, chemical handling, storage and transportation, and fluid management solutions.

We offer a wide range of the highly certified offshore containers, baskets, tanks, skips, workspaces and more. As an added value service, our clients can equip the equipment with a GPS tracking system to enhance real-time visibility and asset tracking. Our aim is with this feature, our clients will be able to optimise business processes, supply chain and regulatory compliance. In addition to containers, our services include lifting equipment for attaching and loading appliances.

Offshore Containers & Equipment

There are many things to consider when transferring cargo, tools, equipment, supplies, and wastes from the onshore base and offshore rigs to the platforms.

Altus Oil & Gas Malaysia offers a wide range of the highest certifications of specialist offshore containers, workspaces, and all other lifting equipment.

Our equipment includes:

- Offshore containers
- Offshore tanks
- Offshore baskets
- Offshore skips
- Gas racks
- Modular system

As an added value service, clients have the option to fit the equipment with Asset Tracking System that will increase real-time visibility and tracking of the assets. Our aim with this feature is for our clients to be able to optimise business processes, supply chain, and regulatory compliance.

Lifting equipment

As one of the country's integrated solution providers, we are expanding our services to include lifting equipment.

The equipment also known as 'rigging equipment' or 'lifting equipment' or lifting tackle' such as the wire sling, is commonly used to attach and load the appliances.

At Altus Oil & Gas Malaysia, we provide services to the in-house sling factory, purchasing, rental and consignment to our clients. We strive to meet our clients' expectations and deliver them with excellence.

Chemical Handling, Storage & Transportation

Altus Oil & Gas Malaysia has years of experience working with various chemical companies, either representing them as their marketing and distribution company or providing chemical blending and decanting services.

With those facilities strategically established in Malaysia's major oil and gas activity locations, we are in a position to offer chemical companies the avenue to expand their footprints and services to their customers without having to open their own bases.

Our scope of work includes:

- Marketing representatives
- Storage services
- Blending and decanting services
- Transportation and distribution
- Offshore tanks for offshore transportation

Logistics Solutions

Supply base operation is the most critical node of an offshore logistics supply chain. Selection of the location of an onshore base is also a key critical success factor that will determine cost benefits as farther distance means higher logistics costs.

Through years of operating offshore bases in Malaysia, Indonesia, China and Australia, Altus Oil & Gas Malaysia has developed relevant, vast experience and expertise. Thus, we are able to evaluate the best supply base location (which may include existing supply base, ports and/or any suitable water-front facility) for each campaign project to ensure that our clients have the most cost and efficiency benefits.

Altus Oil & Gas Malaysia services in logistics solutions include supply base operation, consolidated trucking service, project logistics, custom brokerage, shipping agency, freight forwarding and e-logistics.

Supply Base Operations

Supply base operation stands as the cornerstone of an efficient offshore logistics supply chain for any oil and gas company in Malaysia. Without the seamless functioning of supply base operations, the execution of offshore campaigns could falter, leading to inefficiency and increased costs. The strategic selection of an onshore base location is pivotal, as it directly impacts logistical expenses; greater distances translate to higher costs.

Leveraging years of operational expertise across Malaysia, Indonesia, China, and Australia, Altus is primed with the requisite experience to navigate this critical aspect. Our proficiency enables us to meticulously assess and identify the optimal supply base location for each offshore campaign project, ensuring maximised cost efficiencies.

Altus Oil & Gas Malaysia's supply base operations encompass a comprehensive scope of services tailored to meet the demands of offshore ventures:

- Berthing facilities
- Warehouse and open yard for cargo storage and staging area
- Vessel agency services
- Cargo handling
- Rig and vessel importation
- Third-party procurement
- Engineering and minor fabrication
- Provision of skilled manpower
- Work permit facilitation
- Vessel clearance

By prioritising the seamless operation of supply base facilities, we remain committed to delivering unparalleled value to our clients in the oil and gas industry across Malaysia and beyond.

Project Logistics

As a growing logistics company in Malaysia, Altus Oil & Gas Malaysia specialises in handling project logistics for the oil and gas industry. Logistics solutions for your projects are always complex and challenging, especially when you have to transport many line items that are heavy, oversized, and in various shapes from one location to another or from one country to another.

Various aspects of the supply chain need to be planned and strategised to ensure safe, efficient, and cost-effective logistics. With years of expertise, Altus Oil & Gas Malaysia, the leading logistics company in Malaysia, has emerged as a trusted partner for top-notch logistics services, ensuring the timely delivery of all industry-specific needs.

Our logistics solutions include:

- Various modes of transportation – heavy lift charter, sea, and air freight
- Importation handling – cargo clearance, customs brokerage, tax consultation
- Heavy lift cranes and land transportation
- Free zone formalities
- Expediting
- Logistics planning
- Project logistics management supporting offshore campaigns such as T&I, hook up, salvage, etc.

Through years of experience and knowledge acquisition, Altus Oil & Gas Malaysia has developed in-house capabilities for consulting, planning, management, and execution, allowing us to offer integrated services to our clients. We have successfully executed project logistics jobs both onshore such as for large refinery construction, and offshore like multi-discipline hook-up and commissioning projects.

At Altus Oil & Gas Malaysia, we understand the intricacies of project logistics in the oil and gas industry. Our dedicated team is committed to providing seamless solutions tailored to your specific requirements.

Consolidated Trucking Service

Altus Oil & Gas Malaysia Sdn Bhd provides a consolidated trucking service that connects the Kemaman Supply Base (KSB) and the Tok Bali Supply Base (TBSB). This service delivers a structured, reliable, and cost-effective solution for transporting cargo between supply bases.

With a strong presence at both locations and extensive knowledge of oil and gas logistics, Altus Oil & Gas Malaysia's consolidated trucking service presents a more efficient alternative to traditional trucking. It focuses on enhancing efficiency, accountability, and operational simplicity.

Our professionally managed consolidation model and scheduled trucking movements enable clients to streamline their logistics planning, minimise coordination efforts, and achieve greater certainty in delivery timeliness.

Custom Brokerage

Altus Oil & Gas Malaysia is licensed as a custom brokerage agent in all main ports in Malaysia. Our cargo clearance system is electronically linked directly to the Royal Malaysian Customs (RMC) system.

Altus Oil & Gas Malaysia personnel is also certified by the RMC to act as Customs Agent and is highly knowledgeable on all entry procedures, admissibility, requirements, classification, valuation, and the duties and taxes imposed on exported/imported goods.

Shipping Agency

Navigating vessel calls at foreign ports can be a labyrinthine task, rife with potential complexities and expenses if mishandled. At Altus Oil & Gas Malaysia, we understand the intricacies of this process and offer reliable shipping agency services in Malaysia tailored to meet all of your needs.

Our comprehensive suite of services as a shipping agency in Malaysia includes:

- Vessels inward and outward clearance
- Port services
- Government agencies formalities
- Crew handling – work permit and pass, OKTB, letter of guarantee, meets and greets, accommodation and transportation
- Bunkering
- Husbanding and ship supplies
- Minor onboard repair

When you entrust your vessel calls to Altus Oil & Gas Malaysia, you can rest assured that our experienced team will efficiently manage interactions with local authorities such as immigration, customs, marine department, health and quarantine divisions, as well as port operators and authorities. Moreover, our familiarity with local culture and traditions enables us to navigate any challenges seamlessly.

Freight Forwarding

Altus Oil & Gas Malaysia extends comprehensive logistics solutions, including freight forwarding services, catering to diverse cargo needs. Leveraging the extensive global network of the Altus Group and collaborating with proficient third-party partners, Altus Oil & Gas Malaysia ensures efficient transportation of cargo to destinations worldwide.

Our freight forwarding and cargo agent services in Malaysia encompass:

- **Global Network Accessibility:** Altus Oil & Gas Malaysia taps into its widespread network to manage cargo movements across international borders efficiently.
- **Tailored Solutions:** We offer customised freight forwarding solutions to meet the unique requirements of each cargo consignment
- **Efficient Handling:** With experience and expertise, our team ensures swift and secure handling of cargo, adhering to industry standards and regulations
- **End-to-End Support:** From documentation and customs clearance to tracking and delivery, Altus Oil & Gas Malaysia provides comprehensive support throughout the freight forwarding process
- **Diverse Cargo Types:** Altus Oil & Gas Malaysia caters to a wide range of cargo types, including oilfield equipment, marine supplies, and general cargo, with precision and efficiency.

Altus E-logistics Solutions (AES)

Altus E-logistics Solutions (AES) is a groundbreaking digital platform developed by Altus Oil & Gas Malaysia Sdn Bhd. Understanding the challenges faced by manual processing within the energy industry, AES has been meticulously crafted to revolutionise customer and operational experiences.

AES offers a comprehensive suite of features tailored to enhance efficiency and productivity:

- Online ordering: Simplify the procurement process with an intuitive online ordering system
- Notification alerts: Stay informed in real-time with timely notifications regarding important updates and milestones
- Real-time order tracking: track the progress of your orders seamlessly with real-time updates
- Centralised document management: Streamline document handling and access essential files conveniently from a centralised repository
- Contract summary: Gain insights into contract details and key terms for improved transparency and clarity
- Dashboard reporting: Access comprehensive reports and analytics through a user-friendly dashboard interface.

With AES, Altus Oil & Gas Malaysia Sdn Bhd empowers clients through real-time and efficient communication, allowing requests to be made anywhere, anytime and automatically logged into the system. This innovation facilitates smoother project operations and heightened performance.

Our Certifications

Our integrated management system is certified by BV and reflects our dedication to QHSE.

Altus Oil & Gas Malaysia handles difficult jobs, in difficult locations, safely, and without harm to the environment.

Altus Oil & Gas Malaysia environmental policy ensures that, whenever practicable, our activities are ahead of legal requirements and standards for environmental best practice in the countries where we are operating.

Our ISO Certifications:

- ISO 9001:2015 (Quality Management Systems)
- ISO 14001:2015 (Environmental Management Systems)
- ISO 45001:2018 (Occupational Health & Safety Management Systems)

Additionally, Altus Oil & Gas Malaysia is a registered CIDB G7 contractor in Malaysia.

Our Commitments

Quality, Health, Safety, & Environment

- Certified with ISO 9001, 14001, and 45001 for Integrated Management Systems (IMS)

Sustainable Development

- Developing local communities
- Net-zero carbon target

Ethics & Compliance

- Employee Ethics
- Our partners are selected and vetted
- Comply with the Foreign Corrupt Practices Act (FCPA)

Altus Oil & Gas Malaysia has clearly defined its corporate values, guiding us toward excellence in every operation, every time, everywhere.

Continuity

- Work towards a sustainable future in everything we do
- Create lasting and added value for our stakeholders
- Embrace changes – be open, flexible and well prepared
- Inspire respect and loyalty from our team and local communities

Endeavour

- Maintain the highest level of safety awareness for every job
- Commit wholeheartedly to meeting our goals and objectives
- Relish challenges – even when the going gets tough
- Remember that hard work and commitment bring lasting success

Excellence

- Approach challenges positively, professionally and responsibly
- Commit to exceeding expectations in every job we do
- Deliver according to agreed schedules and budgets
- Seek to be ahead of legislation rather than reacting to it

Humility

- Acknowledge our limitations and take responsibility for our failures
- Remember that we can always improve
- Respect, listen to and seek to learn from others
- Use failures and shortfalls as opportunities to improve and grow

Integrity

- Act in all matters honestly, openly, and in the “right” way even where this is beyond formal regulations and requirements
- Create a bond of trust with our stakeholders
- Work to maximise our positive environmental impacts and be accountable for any damage we may cause

Teamwork

- Appreciate diversity and the contribution that every individual’s expertise and experience brings
- Work as One Team to complete difficult jobs in difficult places, safely
- Celebrate our successes and remember that they belong to all of us

Our Location

Our history dates back to 2010 when we opened our first office in Johor Bahru. Today, Altus Oil & Gas Malaysia's business is expanding across Malaysia with offices in Kuala Lumpur, Kuantan, Kemaman, Tok Bali, Labuan, Bintulu, Miri, Kota Kinabalu & KLIA. Altus Oil & Gas Malaysia has also developed capabilities, tools and resources that will enable us to provide solutions nationwide and regional.
